The diagram illustrates the Umrah Ticket Booking System with the following use cases and relationships:

- Client Management:** Includes "Melihat detail client", "Menghapus client", "menerima/menolak client", "Registrasi client", "Mengelola client", and "Mengubah data client".
- Transaction Management:** Includes "Batalkan pemesanan", "Membayar dp", "Membayar lunas", "Memesan tiket", "Melihat status pembayaran", "Validasi", "Logout", "Login", "Membuka web", "Melihat Notifikasi", "Transaksi pemesanan tiket", and "Memeriksa status login".
- Ticket Management:** Includes "Melihat detail tiket", "Menghapus tiket", "Mengubah tiket", "Menambah tiket", "Mengelola tiket", "Menghapus rute", "Mengubah rute", and "Menambah rute".
- Account Management:** Includes "Mengubah data akun" and "Melihat bukti serta mengubah status bayar".

Relationships are shown with solid arrows for direct dependencies and dashed arrows labeled with stereotypes like <<include>> for generalization or inclusion.
